Source:
Author's calculations based on the 1990 and 2000 decennial Census and the 2005 and 2006 American Community Surveys (combined).
Note:
Industries are listed in order of 2006 employment share from largest to smallest. Employment shares are calculated as the percentage of workers age 25 to 64 employed in each industry. College educated share are calculated as the percentage of worker age 25 to 64 that have a degree. Industry categories may not be strictly comparable between 1990 and later years due to
classification changes. For a description of industry categories, see www.ipumsusa.com.

## Table A2. Share of total employment and share of college educated workers by occupation

|  | New England |  |  |  |  |  |  |  |  |

Connecticut Labor Department; Occupational Employment Statistics, Maine Department of Labor; Massachusetts Executive Office of Labor and Worforce Development (EOLWD), "The Massachusetts Industry-Occupation Employment Matrix, 2006-2016"; New Hampshire Economic and Labor Market Information Bureau.
Notes:
New England is the sum of Connecticut, Maine, Massachusetts, and New Hampshire. Data for Rhode Island and Vermont were not available. Table excludes farming, fishing, and forestry occupations. Occupations and industries are listed in order of share of college-educated. See Table A2 for college-educated shares.

| Major group OCC code | Detailed occupation | New England |  |  |  | United States |  |  |  | Distribution of educational attainment |  |  |  |  |  |

Labor Statistics. Distribution of education attainment is based on the author's calculations from the $2006-08$ combined American Community Survey.
Occupations with "critical vacancies" are those where the vacancy rate is greater than or equal to $4.3 \%$, the number of vacancies is greater than or equal to 400 , and total employment is greater than or equal to 1,500 in New England in 2006 .

Table A5. Occupations projected to grow rapidly in New England, 2009-2018 (continued)
By detailed occupation group

Source:
Auther's calcutions based dat from H. Bureau fabor Statistics and the 2006.08 com .
Notes:
Number of current jobs is the sum of 2009 total employment as reported by the U.S. Bureau of Labor Statistics plus the average number of vacancies for 2009 as reported by the Conference Board's Help Wanted On-Line (HWOL) Survey. Number of
future jobs is projected by applying the 2008-2018 growth rates as projected by the U.S. Bureau of Labor Statistics for the U.S. to 2008 employment for both the region and the nation separately. The distribution of jobs across education levels is our
lower bound measure which is based on the actual distribution of educational attainment from the 2006-08 combined American Community Survey. Rapidly growing occupations are those that have either a high rate of job growth (greater than or equal
to 20 percent) combined with an employment gain of 1,000 jobs or a large employment gain (defined as greater than or equal to 9,000 jobs which is roughly equivalent to 1 percent of overall job growth).

Table A6. Projecting educational attainment between 2009 and 2019
New England, native white males

|  | Cohort 1 |  | Cohort 2 |  | Cohort 3 |  | Cohort 4 |  | Cohort 5 |  |

## Source:

Author's calculations using the 2006-08 combined American Commmunity Survey
Notes:
Lower bound estimates are made by assigning the education distribution of current cohorts age 25-29 and 30-34 in 2009 to those individuals who will be aged 25-29 and 30-34 in 2019. Upper bound estimates are made by also applying the change in educational attainment between 1990 and 2000 for individuals age 25-29, 30-34, and 35-39 in 2009 to those aged 25-29, 30-34, and 35-39 years in 2019. Market adjustment estimates are made by also applying changes in high school graduation, college continuation, and college completion rates over the last decade to individuals who will be age $25-29$ and 30-34 in 2019.

Source:
Author's calculations for the 2006 American Community Survey.
Notes:
Sample include population residing in non-institutional group quarters (e.g. college dormitories) but excludes those in institutional group quarters (correctional facilities, nursing and in-patient hospice facilities, mental hospitals, juvenile group homes and juvenile residential treatment centers). Migration rates for New England are for division-to-division moves. Massachusetts migration rates are for state-to-state moves. Migrants are defined as individuals who lived in a different state, region, or country in the previous year. College graduates are defined as individuals, age 25 to 64 years who have completed a bachelor's degree or higher and are also not enrolled in school. Young professionals are defined as individuals,
age 25 to 39 years who have completed a bachelor's degree or higher and are also not enrolled in school. Working age adults are defined as indivuduals, age 25 to 64 years with any level of education.
